Education

BN College of Engineering and Technology, Lucknow 2022 – 2026

Bachelor of Technology in Computer Science and Engineering (Data Science)

CGPA: 7.01/10

Relevant Coursework: Data Structures and Algorithms, DBMS, Operating Systems, OOPs, Computer Networks

Skills

Languages: C++, Python

Frameworks: React.js, Next.js, Django

Tools & Technologies: Git, GitHub, Node.js

Projects

Audiometer — Web & App based Digital Audiometer *React.js, React Native, Tailwind CSS*

- Developed a cross-platform digital audiometer generating audio samples of varying frequencies and intensities for hearing tests.
- Designed an interactive interface allowing users to respond to sound stimuli and view audiogram results.
- Implemented logic for interpreting audiograms to assess preliminary hearing conditions.

The Never Winning Game — AI Algorithm-based Tic Tac Toe *Python*

- Built an AI-powered Tic Tac Toe game implementing the Minimax algorithm for an unbeatable opponent.
- Focused on recursion, logical reasoning, and handling all possible game states.

Achievements

- Participated in Smart India Hackathon (SIH 2023) with the project "Audiometer".
- Developed and deployed full-stack web applications using React and Django.
- Consistently enhancing data structures and algorithmic problem-solving through competitive coding.

Profile Summary

A passionate B.Tech student specializing in Data Science with a strong foundation in C++ and Python. Proficient in full-stack web development using React and Django, with hands-on experience building real-world projects. Seeking opportunities in software development and data-driven application domains.
